Headquarter: Michael Weiss nr 2 Brasov (RO)
Robert - Hamerling - Gasse nr 16 Wien (AU)

In the same town where Alessandro Volta invented the battery, Stefano Pozzi was born on September 6, 1964. When he started he collaborated with interchoice company for the project Sheraton Hotel Dubai, Sheraton Hotel Abu Dhabi, Marina Center, Hotel Singapore and King Royal Terminal Airport. His professional career began when he started working with the architects Andrea Ferraro, Anthony Zanuso and Charles Chambry. It is there that he gained most of his experience as a designer. In 1989, he established his own design company Archistudio with a focus on interior and industrial design. In collaboration with some of the best Italian furniture companies, Stefano gained industry recognition in the international design area through many of the designs he created. In 2001 Stefano decided to take his talent to the city of Bucharest in Romania where he opened an architecture and industrial design studio. He ventured into a new area of design when he began working with entertainment companies to create spaces for the nightlife industry; his latest project of that sort is the Bamboo Club in Bucharest. Since 2016 he started designing international architecture projects. To name a few: Pearl Dubai and sky-scraper in Dubai Marina. In 2018 he designed the interior for Aro Palace Hotel Brasov, a five star hotel. Some other important projects in 2019 and 2020 Oxia Club in Bucharest (RO), Mamela Hotel in the Isle of Capri (IT), Alezzi Catamaran in Istanbul (TR), LakeView Hotel, in Valiug (RO), just to name a few.

STEFANO POZZI & PARTNERS is a global studio for sustainable architecture, urbanism, engineering and design, founded by Stefano Pozzi. With offices in Brasov and Wien and projects across the world.

Stefano Pozzi Founder

We believe the best architecture comes from a synthesis of all the elements that separately comprise and inform the character of a building: the structure that holds it up; the services that allow it to function; its ecology; the quality of natural light; the symbolism of the form; the relationship of the building to the skyline or the streetscape; the way you move through or around it; and last but not least its ability to lift the spirits. By working together creatively from the start of a project, architects and engineers combine their knowledge to devise integrated, sustainable design solutions.
